

Reports Module

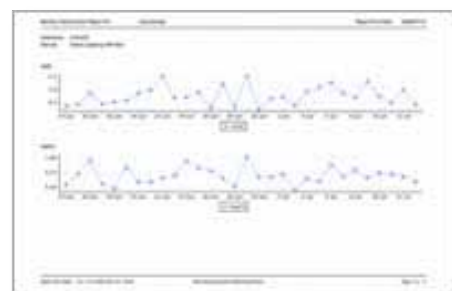

The Reports module brings report generation and automation capabilities to Opsview Enterprise. Fully supported and certified as part of your subscription, we can also provide report design and customisation services to help you get the most out of Opsview.

Features

- Automatically generates reports on a pre-defined interval and distributed by email to a list of recipients using the JasperReports®
- Keywords provide a flexible yet clear method of reporting service levels to business managers and customers
- Standard reports can be customised using the Jasper iReport to suit your business needs
- Supports PDF, Excel, HTML and RTF

Benefits

- Saves time by creating and distributing professional reports for use by technical staff, business managers and customers

- Provides insights into availability, performance and capacity for forward planning and reduced downtime
